week 01

ESCAPE ROOM

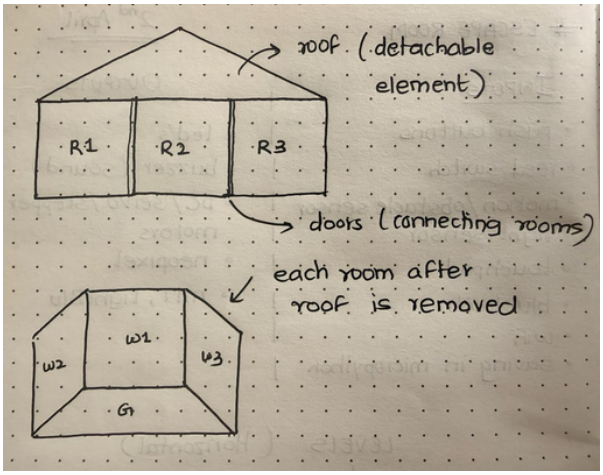
2nd April

INPUTS	OUTPUTS
• push buttons	• led's
• reed switch	• buzzer (sound)
• motion / obstacle sensor	• DC / servo / stepper motors
• light sensor	• neopixel
• touchpad	• MIT, lightBlu
• bluetooth	
• wifi	
• saving in micropython	

ODT

CAR (character)
- → indicators → sensors (obstacle)
- → headlight → movement
- → popping of trunk (thru ~~wifi~~ bluetooth)
- → wipers

BITTU
- → mascot
- → voice command
- → motion sensor



7th April

Entire Storyline

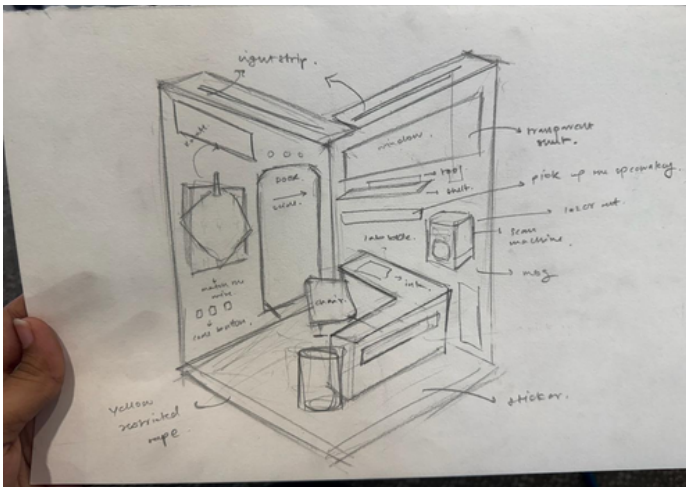
Dr XYZ, a brilliant scientist working on a classified experiment involving human memory extraction & preservation.

CONFLICT

Dr XYZ discoverd → invention could be misused to manipulate, erase / control human memory. Before the system was taken over, she locked the entire system behind 3 security layers.

FINAL MSG FROM XYZ (before disappearing)

If you are seeing this, they (bad ppl) have taken the lab. "I couldnt destroy the machine, but I hit the shutdown protocol. Follow the clues. Finish what I started"



7th April

List of puzzles

- → blue light → invisible code → after puzzle is solved
- → code triggers opening of doors (phone)
- → drawer opening & closing
- → buzzers (identifying)
- → rules of game on phone
- → reed switch (magnet trigger)
- → guessing the right order
- → servo motor (photo frame reveal codes)
- → correct rotation angles (dials)
- → countdown timers (for game)
- → permutation combination of no's
- → display using laser cut things (to end the game
- → QR code
- → story driven puzzles (narratives as clues)
- → paper ball clue (trigger)

① ▸ CODING → Webpage Normal.
▸ INTERFACING
▸ MODEL BUILDING.
↓

Foamboard.
Cardboard
Acrylic → Lazer cutting.
MDF - Lazer cutting → showing symbols
Wheel - Lazer cut.
Colour Papers.
Tape
Print outs.
Glue
Scissors.

9th April → 22nd April

12 Days.

- 11th April — Coding.

Room 01

08th April

① Player connects with wifi
→ webpage → "game start" → garage door opens → lights on.

→ phone msg → access given → finger scan
→ blue LED → invisible ink → code appears
→ permutation combination on phone → when "right" → no change to colours → motor reveals next puzzle → match the wire → door opens

materials

→ esp32
→ invisible ink pen ~~tut~~
→ blue light
→ LED strip light.
→ servo motor (next puzzle) !!!
→ copper wires (white)
→ stepper motor (door)
→ touchpad (capacitive touch)

Room 02

Door opens → msg on phone → collect keycard → scan machine starts blinking → reed switch activates after scanning → laser cut pattern reveals → spinning wheel game → door opens

materials

→ magnetic material (keycard)
→ led's (blinking)
→ reed switch (scan machine)
→ led (screen background) → reveal code
→ stepper / servo motor (mostly stepper)
→ door opens (stepper motor)

laser cut

↳ pattern reveal (window)
↳ keycard (acrylic)

Room 03

Door opens → ~~#~~ dr. benedict is watching you (phone msg) → give permission → CCTV laser "on" → points to a secret code → enter on phone → central cabinet rotates → reveals push button → click to destroy → dhua dhua

"Destroyed"

GAME ENDS

materials

→ laser (inside cctv)
→ ~~se~~ stepper motor (cabinet)
→ push button
→ ~~#~~ smoke machine components
